# DEEP TANUSH

**GAME DESIGNER • LEVEL DESIGNER**

deeptanush55@gmail.com
+91 9848325520
Hyderabad, India (Remote / Relocation)

## ◆ SKILLS & TOOLS

### ENGINES & CODE

- Unity 3D (C# Scripting)
- Unreal Engine 5 (Basics)
- Blender (Greybox / Layout)
- Git / Version Control

### GAME DESIGN

- Mechanics Prototyping
- 3D Puzzle Progression & Logic
- Player Affordance & Cues
- Pacing & Difficulty Balance
- Playtesting & Telemetry

### LEVEL DESIGN

- Spatial Layout & Flow
- Metric Blocking / Greybox
- Sightlines & Funneling
- Environmental Narrative

## ◆ EDUCATION

**Backstage Pass Institute of Gaming**
B.A. in Game Design
2023 – 2027

**Sri Chaitanya Junior College**
Higher Secondary (MPC)
2020 – 2023

**Faust High School**
Secondary Education (SSC)
2007 – 2020

## ◆ LANGUAGES

| | |
|---|---|
| **English** | Professional |
| **Telugu** | Native |
| **Hindi** | Professional |

## ◆ PROFILE

Game Designer and Level Designer pursuing a B.A. in Game Design at Backstage Pass Institute of Gaming. Specializes in **3D spatial puzzle architecture**, **mechanics prototyping in Unity (C#)**, and crafting immersive environmental storytelling. Co-creator of **UI (Unwanted Internship)**, a published 3D mystery on itch.io. Focused on player affordances, tight feedback loops, and zero-generative-AI bespoke craft.

## ◆ SHIPPED PROJECT

### UI (Unwanted Internship)

**RELEASED ON ITCH.IO // PC**

Role: Game Designer & Level Designer  Engine: Unity 3D  Team: 5 Devs

Platform: PC

- **Multi-Timeline Progression:** Designed the overarching puzzle flow spanning 3 distinct chronological eras (Retro Bunker, Chemistry Lab, Cybernetic Core) linked via a central elevator nexus.
- **Aerial Drone Mechanic:** Conceptualized and tuned the autonomous AI Drone (ALP-07) for vertical reconnaissance, duct navigation, and clue scouting.
- **Meta UI Puzzles:** Authored in-world deduction puzzles, including a clever meta puzzle where players reference visual UI components to deduce solutions.
- **Level Staging & Sightlines:** Greyboxed and staged level geometry across all 3 chambers, directing player line-of-sight to key interactables upon entry.
- **Playtest Telemetry:** Led blind playtesting sessions to tune difficulty curves and eliminate cognitive friction bottlenecks.
- **Bespoke Asset Craft:** Maintained a 90% bespoke 3D asset pipeline with zero generative AI within a multidisciplinary team.

## ◆ DESIGN METHODOLOGY

**Rapid Whiteboxing**
Prototyping spatial scales, obstacle metrics, and sightline funneling early in Unity.

**Player Affordance**
Visual hierarchy, contrast signifiers, and intuitive mechanic affordances without handholding.

**Game Design Docs**
Clear one-pagers, puzzle dependency graphs, and logic flowcharts for team clarity.

**Iterative Feedback**
Refining puzzles based on playtest observation, telemetry logs, and cognitive friction tuning.
